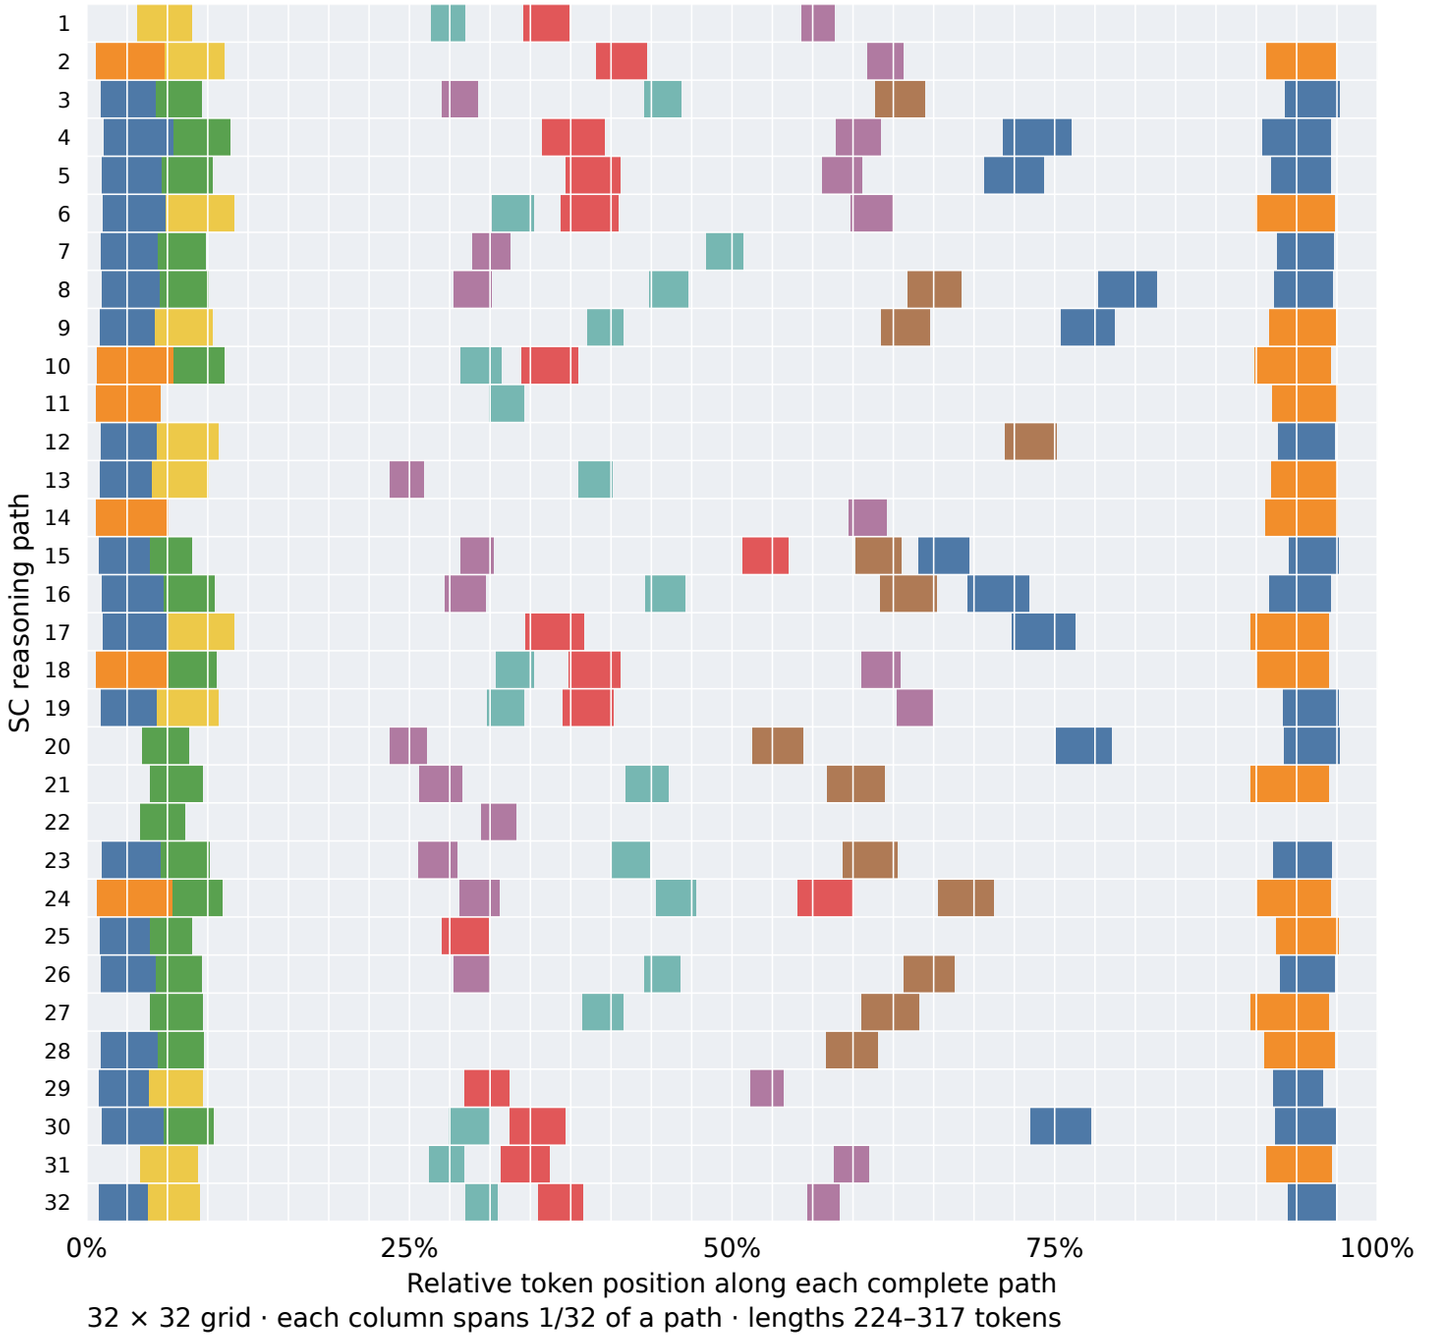
Repeated token fragments

Llama-3.1-8B-Instruct · GSM8K · gsm8k_0657 · 32 independent SC paths



Same color = same fragment

- total cost of getting and maintaining the plane for the first year
  12 tokens · 21/32 paths
- the total cost for James to get and maintain the plane for the first year
  15 tokens · 15/32 paths
- , we need to calculate the cost of the plane
  10 tokens · 19/32 paths
- are 12 months in a year,
  8 tokens · 23/32 paths
- 2 * 5000 = 10,000
  11 tokens · 16/32 paths
- twice as much as the hanger rental
  8 tokens · 20/32 paths
- , we need to calculate the initial cost of the plane and the
  13 tokens · 11/32 paths
- 10,000 * 12 = $120,000
  11 tokens · 13/32 paths

Gray = outside displayed fragments
Colors apply only within this example.

32 × 32 grid · each column spans 1/32 of a path · lengths 224–317 tokens

Subcell color boundaries preserve token positions. Equal horizontal widths need not contain equal token counts across paths.

Exact matches of at least 8 tokens; up to 8 disjoint fragment types shown. Wording overlap alone does not establish reusable computation.
