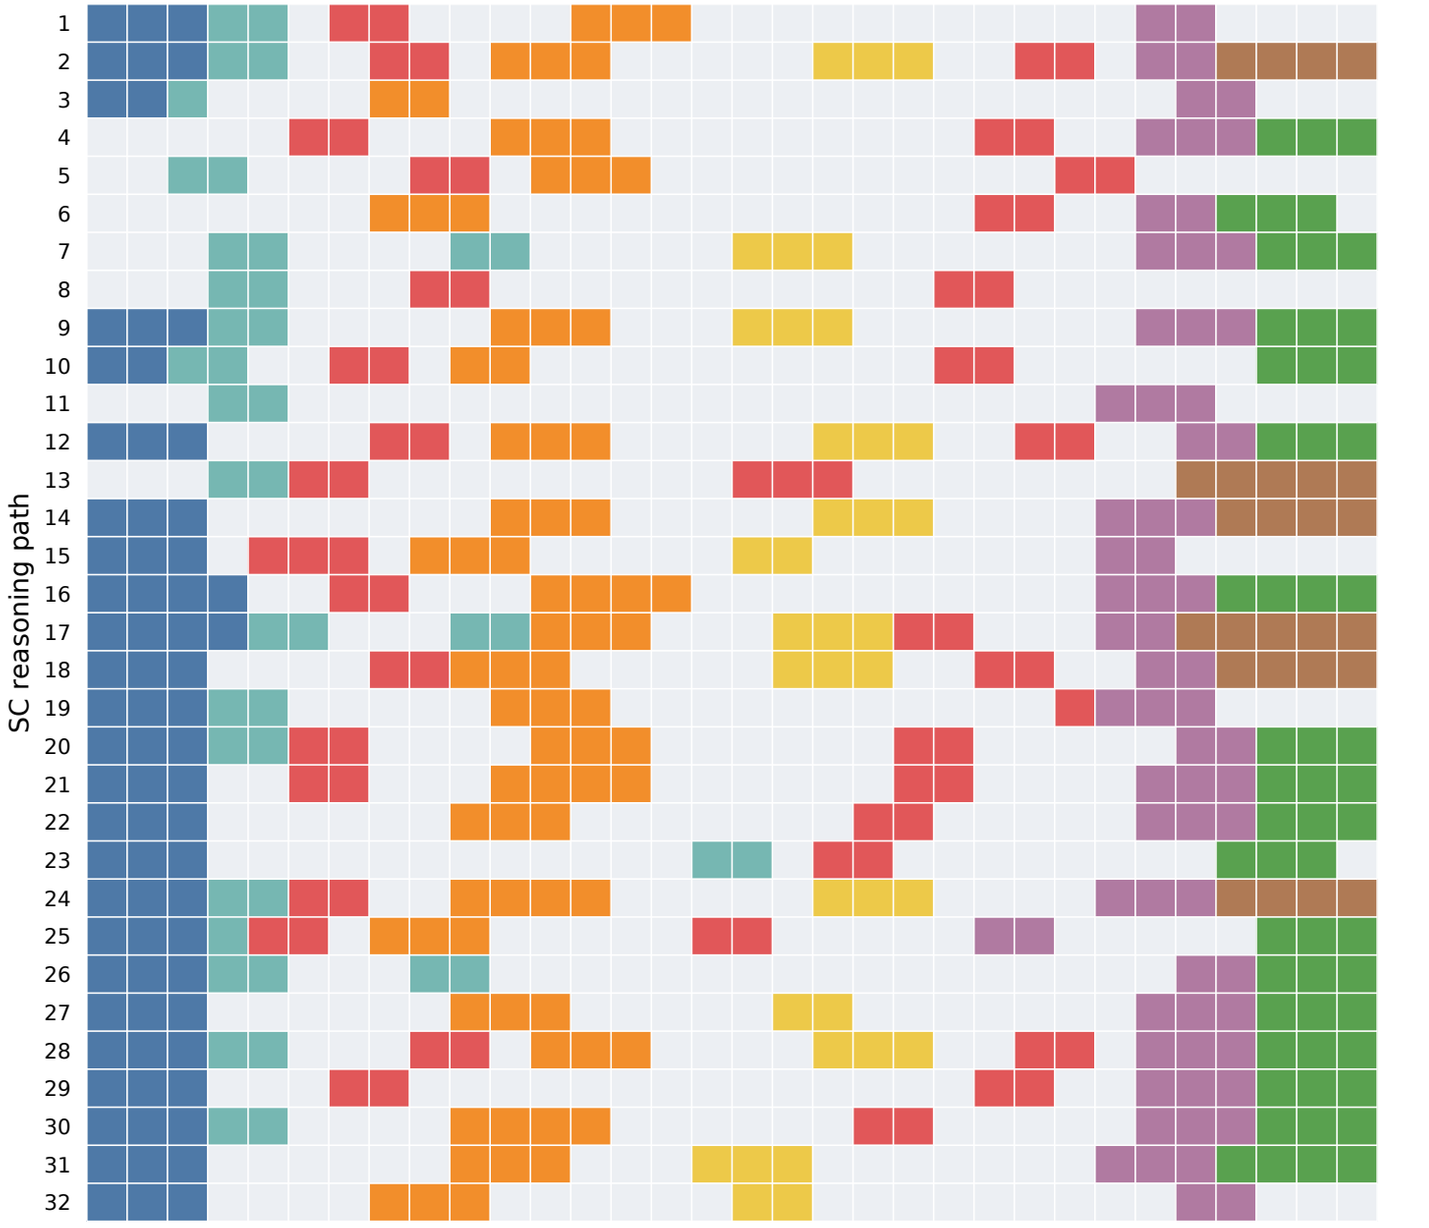
Repeated token fragments

Llama-3.1-8B-Instruct · GSM8K · gsm8k_1078 · 32 independent SC paths



Same color = same fragment

- To find out how many more weeks it will take Melanie to collect 200 toothpicks, we
  20 tokens · 25/32 paths
- 10 toothpicks/week * 12 weeks = 120 toothpicks
  16 tokens · 25/32 paths
- , it will take Melanie \boxed{8} more weeks to collect 200 toothpicks
  19 tokens · 18/32 paths
- 80 toothpicks / 10 toothpicks/week
  12 tokens · 27/32 paths
- saves 10 toothpicks each week
  8 tokens · 23/32 paths
- toothpicks she has saved so far
  8 tokens · 19/32 paths
- icks - 120 toothpicks = 80 toothpicks
  13 tokens · 13/32 paths
- , Melanie will need to save toothpicks for 8 more weeks to collect 200 toothpicks. \boxed{8}
  27 tokens · 6/32 paths

Gray = outside displayed fragments
Colors apply only within this example.

32 × 32 grid · each column spans 1/32 of a path · lengths 202–405 tokens

Any highlighted overlap fills the cell; multiple colors use the largest overlap. Filled area is not exact token coverage.

Exact matches of at least 8 tokens; up to 8 disjoint fragment types shown. Wording overlap alone does not establish reusable computation.
